DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-59, drawn to methods of haplotyping, classified in class 435, subclass 6.
 - II. Claims 60-64, drawn to kits comprising two sets of ASO probes, classified in class 536, subclass 24.3.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the kits may be used in methods aside from haplotyping methods. The ASO probes may be used in isolating the genes of interest, hybridization and PCR assays, in aptamer screening methods or in antisense methods. Furthermore, the haplotyping methods are not each directed to specifically using ASO probes.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by the different classifications and their divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1634

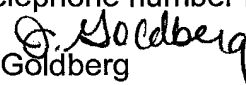

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
